

# 8-days Short Basic Close Protection Training

Attendees of this Close Protection Training have the opportunity to learn an unmatched level of personal protection essential in everyday situations with corporate executives, dignitaries, celebrities, and at-risk individuals. This program is designed to teach the procedures required to provide professional protection, utilizing both classroom training and practical exercises. Participants gain a thorough understanding of the areas of risk and vulnerability to ensure the highest level of protection.

- Study real world kidnapping and assassination incidents and discuss how they could have been avoided.
- Learn to detect surveillance and practice sound counter-surveillance techniques.
- Review protective detail operations and motorcade procedures.
- Understand the benchmarks and importance of advance security surveys.
- Review emergency medical techniques necessary to ensure the complete safety of your protectee.
- Learn various behavioural traits to detect potential assailants.
- Examine command post equipment and operations necessary to enhance your security and manpower.
- Apply classroom lessons in practical field exercises and assault-on-principal scenarios based on real world models.
