

Firearms Training

De ICPTA offers a variety of (advanced) firearms training programs consisting of a mixture of classroom and live-fire exercises, with the majority of the time spent on the range engage in real world shooting scenarios.

- Learn the criteria regarding proper application of the force continuum and the use of lethal force.
- Review equipment and ammunition selection for personal protection operations.
- Learn the most effective stances and firing positions for the protection specialist.
- Practice the application of drawn/concealed weapon retention techniques.

Apply specialized protection weapons handling techniques in the following practical exercises:

- Tactical reload/malfunction drills,
- Drawing from a concealed carry position,
- Turn and fire drill,
- Failure to stop drill,
- Multiple target drills,
- Formation shooting,
- Low-light shooting,
- Street shooting exercises,
- Cover and evacuation live fire.
